

**BOWA MetraBag<sup>pro</sup>**  
Simplicity of In-Bag Morcellation

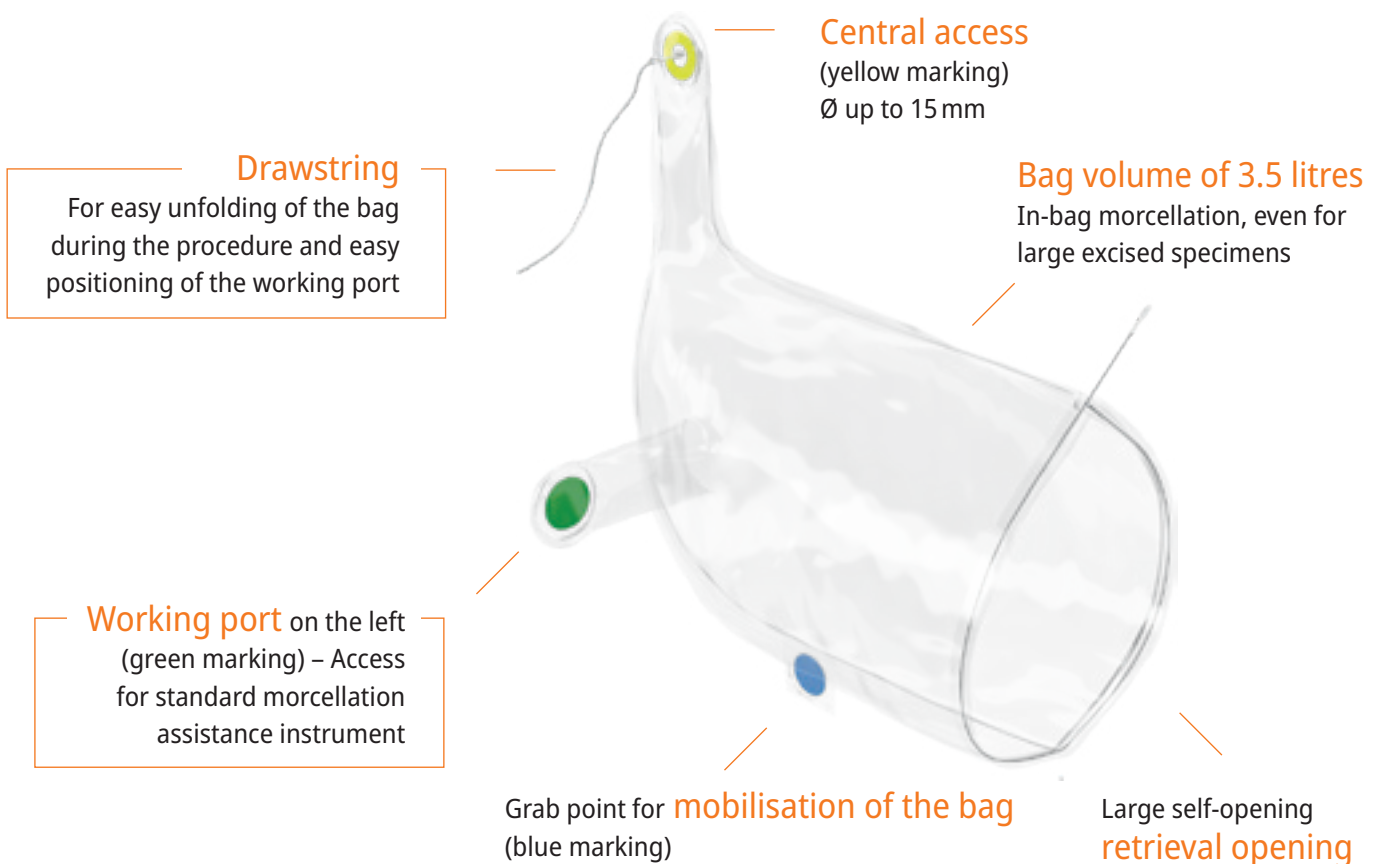

# In-bag morcellation made easy

Our goal is to simplify surgical procedures.

MetraBag<sup>pro</sup> from BOWA MEDICAL is a tissue containment system that is flexible and easy to use during surgical procedures. It is inserted via a 10-mm trocar and offers

fast positioning of the desired working port. We want you to achieve the best possible surgical outcome – without needing to change your surgical procedure.

- **Flexible port positioning – no need to change your surgical technique**
- **Transparent bag material allows the usual visualisation of surrounding tissues**
- **Easy insertion using a 10-mm trocar**

# For the well-being of your patients MetraBag<sup>pro</sup> – The standard for morcellation of benign tissue in gynaecology

> 10,000 successful procedures\*
